

RIVERVIEW HOSPITAL

World Class Care - Close to Home

In 2009, Riverview Hospital celebrated a century of service to the people of Hamilton County and central Indiana. Founded with a mission of improving and preserving the health and well-being of the people in the region, the hospital today remains committed to redefining the healthcare experience not only for those who turn to Riverview to

receive care, but also to the dedicated staff of professionals who serve them.

From its beginnings more than a century ago, Riverview has evolved into a full-service, 154-bed hospital offering unmatched, comprehensive healthcare services in state-of-the-art facilities. In addition to its main campus located on Westfield Road in Noblesville, Riverview operates fifteen primary, immediate, and specialty care facilities located throughout Hamilton County to offer the convenience of quality healthcare services in a neighborhood setting. Employing almost 1,200 people, the hospital plays a major role in the economy of Hamilton County. Riverview does not receive tax dollars for operating expenses, even though it is owned by the county.

Each year, approximately 750 babies see the first light of day at Riverview. More than 6,500 patients are admitted for inpatient care; 25,000 are treated in the emergency department; and 273,000 receive outpatient treatments. All receive the same high quality care with the most advanced technology available that has come to identify Riverview Hospital.

Riverview is home to more than 350 physicians in 47 medical specialties. They take great pride in offering the finest in healthcare services along with the compassionate care that has identified each of these professionals.

RIVERVIEW CANCER CENTER

Faced with a cancer diagnosis, the first reaction of pa-

not alone in their fight against this disease. Some of the area's best physicians utilize the most advanced technology available in dealing with breast, lung, prostate, or other forms of cancer and are there to offer support, both medically and emotionally. In addition, a patient navigator assists newly diagnosed patients with determining next steps, making appointments and providing general support and information.

RADIATION ONCOLOGY

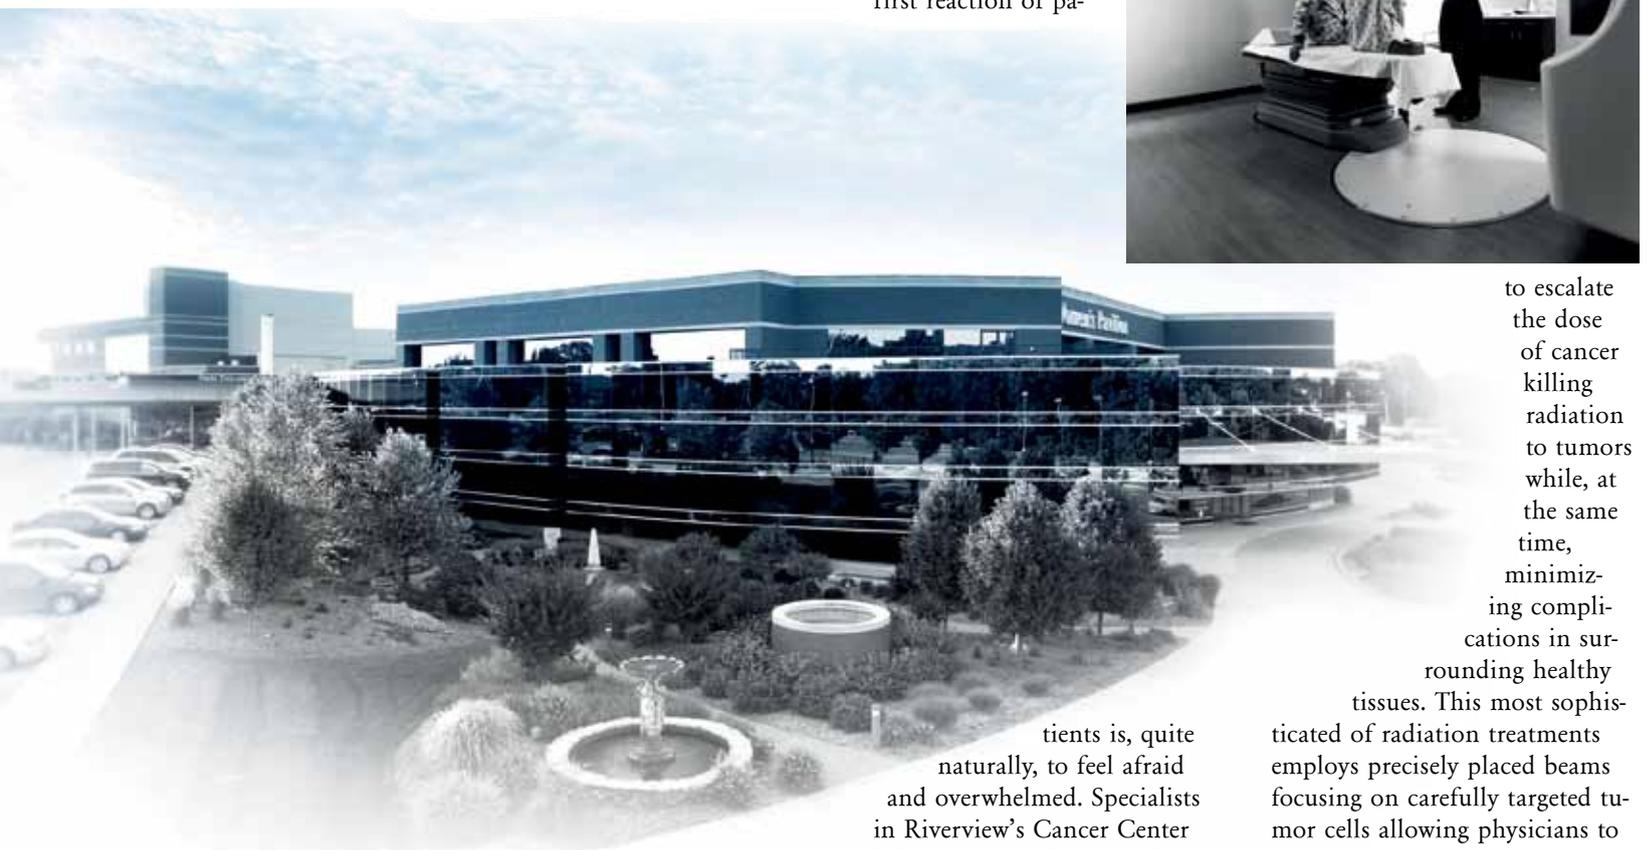

Riverview's radiation oncologists utilize Intensity Modulated Radiation Therapy (IMRT)

to escalate the dose of cancer killing radiation to tumors while, at the same time, minimizing complications in surrounding healthy

tissues. This most sophisticated of radiation treatments employs precisely placed beams focusing on carefully targeted tumor cells allowing physicians to treat areas that would have been

tients is, quite naturally, to feel afraid and overwhelmed. Specialists in Riverview's Cancer Center help patients realize that they are

Carmel: 'round about right

considered too risky just a few years ago.

MEDICAL ONCOLOGY

In partnership with Hematology Oncology of Indiana (HOI), medical oncology is now offered in the main hospital building at Riverview Hospital. The HOI office is located adjacent to the radiation oncology suite to allow for greater collaboration between physicians and ease and convenience for patients who may be undergoing both types of treatments. The services offered in these beautiful new suites are designed so that patients can give and receive support from others during their treatments in a comfortable and spacious group setting.

DIAGNOSTIC SERVICES

Riverview Hospital is home to some of the most advanced diagnostic technology available. Positron Emission Tomography (PET) and Computerized Tomography (CT) are among the most advanced tools in today's fight against cancer. Riverview's team of physicians and diagnosticians use PET/CT to determine whether the patient has cancer, if it has spread, whether the treatment is working, or if the cancer has returned. Pinpointing the exact location and extent of a patient's cancer allows physicians to develop the most effective treatment plan possible.

HEART & VASCULAR CENTER

In matters of the heart, no one cares more about patients' health than Riverview Hospital. The only full-service hospital in Hamilton County to offer comprehensive 24/7 cardiovascular care, Riverview features board-certified interventional coverage for patients experiencing a heart attack and Coronary Artery Bypass Grafting. The hospital also enjoys the advantage of being able to provide heart care in a smaller,

more human environment than larger hospitals enabling staff to offer a very personal experience for patients and their families.

The technology available at Riverview Heart & Vascular is unmatched in the area. Riverview's catheterization lab is the only one in the area with direct capture image technology. This interventional tool, combined with the only 128-slice CT in the county, gives Riverview an unbeatable arsenal of diagnostic and treatment tools.

Riverview's cardiovascular physicians bring years of personal experience in interventional cardiology, cardiac and vascular catheterizations, and cardiothoracic surgery. They chose Riverview because of this unique opportunity to provide personalized attention in an environment where patients can be treated as not simply a number, but as family.

The board-certified cardiologists and specially trained nurses and technicians ensure patients at Riverview Hospital receive quality care with compassion in a variety of services, including:

- ▶ Open Heart Surgery
- ▶ Diagnostic Services
- ▶ Interventional Procedures
- ▶ Disease Management

ORTHOPEDICS

The Riverview Orthopedic team is made up of physicians and other healthcare professionals who provide comprehensive

services in dealing with diseases, injuries, and conditions of the musculoskeletal system, or the body's muscles and skeleton, including the joints, ligaments, tendons, and nerves. Their expertise provides treatment and care of diseases, injuries, fractures, and pain.

Riverview Orthopedics and Sports Medicine has everything a person with bone, muscle, or joint pain needs to feel better again. The team offers diagnosis, treatment, surgical and non-surgical services, and comprehensive rehabilitation services. If their diagnosis indicates that surgery is necessary, they employ leading edge surgical approaches, including the innovative and customized Signature Knee that offers less discomfort and a quicker recovery.

Surgeons at Riverview Orthopedics & Sports Medicine serve as proctors for surgeons across the United States. Among the innovations offered here are the latest anterior hip replacement technique and the Signature Knee, a knee replacement that is designed specifically and uniquely for each patient.

RIVERVIEW HOSPITAL WOMEN'S PAVILION

Women today face the daunting challenge of balancing their careers with the responsibilities of home and family.

fireplace and a peaceful healing garden serve as a serene retreat.

Services include mammography, breast ultrasound, breast biopsies, and DEXA, or bone measurement tests. The quality

Boutique staff are expertly trained and certified in the prop-

When it comes to maintaining their health, they must ensure that they are receiving the best in comprehensive screening, diagnostic, and treatment services. For this very reason, the Riverview Hospital Women's Health Pavilion was created. The finest in breast cancer and osteoporosis treatment is offered in a single convenient location.

The exceptional patient experience begins upon entering the Women's Center in the Pavilion. Private treatment and consultation rooms are decorated in rich colors that exude warm sophistication. A comfortable lounge area in front of a cozy

of the services provided and the expertise of its professionals has earned the Center accreditation in Breast Ultrasound/Biopsy/FNA and Stereotactic Breast Biopsy. These accreditations earned the Center a "Breast Center of Excellence" rating, an award given to only approximately fourteen percent of the 182 accredited facilities in Indiana and only three of which are located in central Indiana.

Riverview Women's Boutique, located on the first floor of the Women's Pavilion, is a facility created by and for women. Understanding that each woman's needs are unique, the

er fitting of traditional and attachable breast forms and partial forms for lumpectomies as well as post-mastectomy bras. They also offer a full line of human and synthetic wigs and partial hair prosthesis as well as hats, scarves, and traditional turbans. Compression garments and a full line of custom compression hosiery are available to help manage lymphedema, edema, varicose veins, and more. All these services, as well as spa products, jewelry, and unique gifts, are provided in the most discrete and caring environment enabling patients to shop with dignity and privacy for all the products they need.

RIVERVIEW MATERNITY CENTER

Experts agree that crucial to the birthing process is the careful selection of a setting that offers the highest quality medical care

and much more. A Special Care Nursery is available to infants with special needs.

HEALTHCARE SERVICES FOR A GROWING COMMUNITY

to pregnancy and childbirth to personal health, these classes provide helpful information in a rewarding learning atmosphere. Riverview also provides a wealth of patient education resources and health information online

to the mother and the newborn along with a flexible and professional staff and luxurious, soothing surroundings. Riverview Hospital's Maternity Center offers just such a setting staffed by healthcare professionals whose goal is to make the baby's entry into the world as comfortable and as joyful as possible.

Riverview's Private Labor/Delivery/Recovery rooms have the feel of a four-star hotel. Private suites feature special touches, such as sophisticated décor with original artwork and comfortable sofa, in-room internet access, flat screen television with DVD player, restaurant quality meals,

Carmel: 'round about right

In addition to the comprehensive services offered at its main campus in Noblesville, Riverview Medical Group serves as Riverview Hospital's network of primary, specialty, and immediate care physicians conveniently located at fifteen locations to serve residents throughout Hamilton County. From pediatric care to family medicine, the network is designed to serve the needs of patients in everything from sports physicals to sore throats to life's everyday minor mishaps.

In addition, Riverview is proud to offer a variety of classes designed to meet the needs of the community. From fitness

that can be easily printed in PDF format.

According to Pat Fox, President/CEO of Riverview Hospital, the people providing the care make all the difference. "We're so fortunate to have leading technology and a beautiful facility," she said. "However, without the caring and experienced staff of physicians, nurses, technologists, therapists, and others, the technology would be useless. Our staff lives in the county, works in the county. Their families attend church and school here. Our commitment is unmatched."
